Nurturing the Next Generation of African Theater: A Zimbabwean Incubator for Global Touring

This collaborative project between ITI Zimbabwe and Zimbabwe Theatre Academy aims to cultivate a vibrant and sustainable theater ecosystem in Zimbabwe with a global reach. By partnering with local organizations, the project will incubate original plays, providing a constant source of practice for actors, a training ground for directors, and a platform for emerging producers. The ultimate goal is to create high-quality theatrical works that respond to contemporary issues and resonate with audiences in Africa, Europe, and the Americas. We seek partnerships with centers, festivals, and theaters worldwide to secure performance dates and spaces for these productions. As well as speaking and workshop facilitation engagements for the participating artists.
